What makes TV Sports Football for TurboGrafx-16 more real than any other 16-bit video football game?

It's the only one for 5 players. The only one that lets your quarterback call audibles and reverse direction plays at the line of scrimmage. The only one that lets

you put a man in motion. The only one that lets you control both field goals and punts. The only one that lets you assign 3 different jobs to 3 defensive players. Throw in sports announcers, bone-crunching league play and killer graphics and sound, and TV Sports Football makes everything else look like pee-wee league.

This is not the type of editorial yours truly likes to write. Recently, I was thumbing through some of the publications that serviced the first home gaming revolution nearly a decade ago. Although the games and game machines of the early eighties were prehistoric by today's standards, there was still plenty to talk about, with dozens of third-party softs, no less than half-a-dozen consoles and a wide variety of hand-held units. But despite such fervor, the floor fell out from under the video game industry, leaving game companies to scramble for the false safety of discounts during the last dark days.

What was the root of the problem ten years ago? Did players simply tire of the unrealistic graphics and lack of game play that the Atari machine generated? Or did video games themselves, as a form of entertainment, simply fall out of favor with the game playing public? The answers to these questions need to be addressed sooner than later.

Are things really that bad? Is the video game industry teetering on the brink of oblivion? Is Mario destined to join pals like Pac-Man and the mood ring? Not just yet, but a new element has to be employed by everyone involved in the fantastic hobby we know and love as video gaming: caution.

For all the ill-will directed at Nintendo because of their restrictive business practices and demanding licensing arrangements, they maintained a level of order by limiting the amount of poor product entering the market. I'm not saying that execs at Nintendo were always right. They committed huge blunders when they insisted that licensees focus on the development of Role-Playing Games. Their first big launch in this series, Dragon Warrior, did so well they are now giving them away as a premium. Even with their mistakes, however, Nintendo made sure that only the best new products were introduced in quantities that wouldn't leave retailers overloaded with inventory.

When Nintendo relaxed these restraints they opened up a flood of products that is absolutely staggering. Video game carts are still selling, but with so many choices available to consumers, big hits are few and far between.

So what does this all mean? Some companies, formed to take advantage of the big bucks that video games used to bring, will fall by the wayside and thin out the inventory, making room for more serious players. New systems and labels, may have difficulty finding shelf space from retailers who aren't quite ready to stock up a whole new line of product.

In the end, the final answer to this growing dilemma will be more smarter production from game companies to avoid overproduction and the mark-downs that follow (bringing with them the financial hurt to all levels of the industry), smarter purchasing from toy stores and retailers to locate only those titles that show real promise and a real plan to pull non-selling games out of the stores to make way for new carts on a regular basis. It works in Japan, why not here?

MORE SUPER FAMICOM!

Your 1991 Video Game Buyers Guide was one of the most impressive magazines I have ever seen! I totally loved your article on the Super Famicom! I am planning to get one the millisecond it comes out! Please answer a few questions. What game will come with it? How much will it cost? Is there a possibility of a CD-ROM for the system?

Neil White
Seattle, WA

I love the mag. It's the best one on the newsstands! In issue 16 you said that you had a Super Famicom, is it really all that it's cracked up to be? Really? Keep up the coverage and show us more photos!

Orben Perkolay
New York, NY

I've been reading everything I can find about the Super Famicom but nobody has addressed the basic problems. If I buy one, will it work over here? A retailer said no but I see them advertised so they must work. Will they hook up to my TV?

Michael Magette
New York, NY

(ed. This is just a very small sampling of the hundreds of letters we get every month about the SF. And, because of your enthusiasm and interest in this spectacular system, we have created a section in our International Outlook column for this

little publicized system. Regarding the questions, the SF will indeed work over here. You will have to connect it up to a VCR or TV with audio video inputs though, as the TV channels are different in the two countries. If you buy the SF in Japan it will cost 25,000 yen (\$185). The power supply, cables and games are all sold separately. The games will cost from 7500 to 8800 yen (\$55 to \$65).

If you decide to buy the package over here, the costs will be somewhat higher.

I wouldn't hold my breath waiting for a CD-ROM player for the SF. While there is a 28 pin external jack on the bottom of the unit and anything is possible, all of the companies are currently scrambling to get out carts. As to the quality of the system and games check our review of Final Fight and Gradius 3!

TELEGENESIS MODEM?

First I would like to compliment you on your great articles and sizzling reviews. Since you always get the news first, what ever happened to the modem which Sega has advertised would be coming out in September?

Paul Larkin
Houston, TX

(ed. Gee Paul, where have you been? We have been using ours for about two months now! But don't go looking for it in the stores quite yet. You see ours is the unit for the Mega Drive and it's costing us a fortune in long distance calls to Japan! The Tel-Tel modem came out in Japan on October 21, 1990. It can be used two different ways - either between friends who can play games

against each other over the phone like Cyberball, Tel-Tel Stadium (Tommy Lasorda) or a mahjongg game. In addition, for a cost of 800 yen (\$7) per month players can subscribe to the Sega Games Library. This service allows users to temporarily download games from Sega to their Mega Drive. A special version of Phantasy Star 2, Putter Golf, Pyramid Magic and Death Maze can be played this way. For an in-depth article see the second issue of our all Sega magazine - Mega Play!)

The Mega Drive Tel-Tel Modem is up and running in Japan!!

MORE SEGA RPG'S!

First of all I wanted to compliment you on your marvelous magazine. EGM goes one step further than any other mag. I own the Sega Genesis and a Nintendo and I love the way you cover them. Secondly I want to ask a few questions: 1) Have you heard of any new Sega RPG's on their way besides Phantasy Star 3 and Vermilion? 2) What is the release date for Phantasy Star 3 and will it be made for use with the CD-ROM?

Billy Spence
Va. Beach, VA

I am a RPG fan who owns a Sega Genesis and Master System. I have a few questions which I would like you to answer in an upcoming issue. 1) Where is Ultima 4 for the Master System? 2) Why are there so few true RPG's for the Genesis?

Stan Cevwell
Pensacola, FL

(ed. It is true that we haven't seen a new Sega RPG in a while. Fortunately Vermilion will be out in a few weeks and Phantasy Star 3 will be following a few months later. Beyond this the future looks very good. Phantasy Star 4 will be one of the first CD games for the Genesis and a new top secret RPG, called Shining Darkness will be out later in 1991. Shining Darkness is going to be a real treat as it will have a full 8 meg plus battery and it's being done by the designers of Dragon Quest 3

GET A CLUE.

PUZZLE

Is to baffle and disturb mentally. To confuse, confound, bewilder and befuddle you. Are you up for this type of challenge? Can you put such pieces within this game together? Figure out this SNK Role Playing Game. A shield, a necklace, pendants and rings. These are possessions you'll want to bring. Visit the towns and GET A CLUE. This will help to get you through. Tornel and Stom will test your strength. When you finally meet Draygon, you've travelled at great length. There's just one way to clear your doubt, call SNK to figure this game out. QUOTABLE QUOTE:

Over the past few months Sega has been running an ad which says that "Genesis does what NintendoTM!". It's a cute play on words but apparently this cut on Nintendo has rubbed a few loyal NES users.

To combat this, one reader - Marty Chamberlin of Magnolia MS. has this comeback to Sega:

"The Super Famicom Is what GenesisTM!"

and 4. For an exclusive look at this great game get a copy of our latest issue of Mega Play. Another project in the works is called Fatal Labyrinth. Unfortunately, the Master System is not getting similar projects. Ultima 4, which we first talked about way back in issue 3, will probably not see the light of day here in the states. It is still scheduled for release in England and die-hard SMS RPGers can pick up a copy over there.)

An exclusive look at the 8 meg Shining Darkness RPG!

MORE TURBO!

I really loved your special article on CD technology in issue 16. It seems that NEC has started to develop more software for their peripheral. I have been thinking of getting the CD-ROM but because it is so expensive I wanted to wait until more software came out. But after seeing the spectacular review you gave to Y's in issue 15, and the great preview of new games to come, I've decided that now is the time to buy the player. I do have a question. Will the TurboGrafx CD-ROM player play the Japanese PC Engine CD-ROM's? If the U.S. unit also plays the CD+G disks will it play any CD? Will it play the Genesis

CDs when they come out? What other CDs will NEC be bringing out?

William Mason
Mechanicsville, VA

I hope all those Turbo players who said you don't cover enough for their system took a long look at your issue 16. With a page of previews, 4 pages on their CD-ROM, a page of reviews and a lot of tips on some of their newest games, you gave them more than they deserve! That's more than you did for the Nintendo! Remember we Nintendo players make up more than 80% of the market and I think there should be more coverage for the system that is keeping the industry going.

Christopher Hasselmann
Prattsburg, NY

In issue 15 you gave the Turbo Express the best new system award. I believe you when you say it's good but I don't have a Turbo. If I buy the Express can I later hook it up to a TV and even add the CD-ROM. Or is this unit only meant to be a portable?

Jason Bailey
Cedar Rapids, IA

(ed. NEC is indeed starting to come out with more CD titles. It looked rather questionable at first with only Fighting Street and Monster Lair out on CD but with Y's, Final Zone 2, Valis 2 and Last Alert now in the stores the peripheral is beginning to get more attention. Add in all the great CD's from Japan (yes the PC Engine CDs will work on the Turbo CD player) like Super Darius, J.B. Harold Murder Club and Y's 3. Plus, consider the long list of new titles that are scheduled for release here later in 1991 such as Sherlock Holmes (previewed this issue) It came from the Desert, Camp California, Jack Nicklaus Turbo Golf, Lords of the Rising Sun, Shadow of the Beast and Loom and you'll see that the CD player will be more of a necessity than a luxury. While compatibility with the new CD+G music videos was built in, the Turbo CD-ROM will not be able to play the Genesis CD-ROM disks when they come out.

It is true that we have devoted more

editorial space to the TurboGrafx in the past few months. Much of that was due to the fact that the CD format is beginning to catch on and NEC was out there first with a CD-ROM player. We want to adequately cover all that is new in this exciting medium. We haven't forgotten the Nintendo system either. With over a dozen pages devoted just to the Super Famicom and it's software, we are very excited about the new 16 bitter from Nintendo.

The Turbo Express, as good as it is, is not meant to be a substitute for the base unit. There are no video outputs for connecting it to a TV, nor can the CD-ROM be connected to it. But consider the good points: Unlike the GameBoy and Game Gear you can use the same software in the portable as in the main system; The add-on tuner makes a fantastic portable TV; And the resolution and color purity are accurate enough to use it as an in-the-field camcorder monitor!)

The new Wanderers from Y's, just out on CD in Japan!

WHERE IS FLIGHT CLUB?... ZELDA 3?

Your coverage of the Super Famicom has been second to none! You say you have covered almost everything but you haven't shown us any pictures of Nintendo's flying game called Flight Club. How about something?

Craig Lantis
Seattle, WA

Back in issue number 6 you said Nintendo would be coming out with Zelda 3 for the Super Famicom. In all of your recent coverage of the games for this system, I didn't see any mention of Zelda 3.

Bob Jackson
Reno, NV

(ed. Over the past year there have been a few changes to the games which will come out for the Super Famicom. Zelda 3 was on the original list but Nintendo has decided to bring out a conversion of the computer game Sim City before Zelda 3.

The flying game that you are probably referring to has had a few name changes. On the original list it was called DragonFly. About 6 months ago it was changed to Flight Club. As of last September, when the system was officially introduced, the name was, and still is, Pilotwings. Any reference to this game as Flight Club is coming from information over 1/2 year old.)

First it was DragonFly, then Flight Club, now it's Pilotwings!

KONAMI FOR GENESIS?...

My favorite game in the arcades is Aliens by Konami. I know they can't do a decent job in trying to make it for Nintendo, so will they do it for the Super Famicom? Or how about the rumors that they are starting to do games for the Genesis?

Peter Skofus
 Fargo, ND

I think that Capcom's 1941 is a rad arcade game. When will it be coming out for the Nintendo? Since they did the other two war games they have to be working on this one! Or are they holding it back so they could do it on the Super Nintendo when it comes out over here?

Jeff Horne
 Baldwin, NY

What is J. Moon doing here?

A COMPLAINT!???

First let me say you did an excellent job in reporting on Strider for the Genesis. Now how about the SuperGrafx version of this arcade masterpiece. Second, let me get one thing straight: You are NOT the best gaming mag. Neither are the other 2 mags I read each month. There is no Best mag! I like your section on Japanese games but your reviews need work! Make them a whole page with fact files, suggested price, and then all 4 of your opinions. Also rate them based on 6 categories (1-10 scale). Sound effects, Music, Graphics, Playability, How fun the game is to play, and Overall.

By the way. You were not, as you said in the editorial in issue 13, the first to report on the PC Engine. A different mag reported on this great system in their April 1989 issue, before you ever reported on it. So therefore there is no way you could have reported on it first.

What happened to Arcade Alley? Also don't trash a game system just because of it's price or lack of softs.

Ed! How ya doin'? I have to disagree (I don't often disagree with you on RPG's) on Avatar on NES. You haven't played Final Fantasy. I have. I'm on my 3rd game! This is the most Fun (with a Capital F) RPG I've played on 8 bit.

Keep up the good work on the Japanese front. Print more in fact. Have you heard anything about Arthur's Quest on Super Famicom?

One last thing. In your next CES Report, include Turbo (I know you're not Anti-Turbo because of your recent super coverage of the new games that the other mags haven't heard of yet!). You have by far the best CES coverage of all the mags! Why? Pictures!!

Regarding Strider for the SuperGrafx, we did get a chance to try out this fantastic 8 meg soft when we

were in Japan in September. It indeed is a spectacular game and really shows off the capabilities of the SuperGrafx. It will be a while before it comes out but to hold you till then here are a few pix of this super soft!

8 meg Strider for the SuperGrafx!

Your comments about our game reviews are, well, ah, interesting. Actually if you think about it we are doing most of what you suggest. If the game is good, it gets a page or even 2, plus a fact file, in the issue before our review crew gets it. The whole purpose of our 4 person review crew is, (as you stated you agree with Ed on RPGs) to give several opinions by a stable base of players, each of which has specific likes and dislikes. A one person review can very easily have biases because he doesn't like that type of game. To break out specific categories gets lengthy and our overall 1-10 number actually takes into account all of the categories that you list. If any one category is unusually good or bad the reviewer mentions it in his comments.

You really went out on a limb to say we weren't the first to break the news on the P.C. Engine. Unfortunately you didn't see our 1989 Buyer's Guide which was published in October 1988. It had a lengthy article about the P.C. Engine. In fact Quaternmann was the first to break the news way back in July 1988, with a photo of R-Type to boot! Sorry Andrew, our editors don't just sit behind their desks waiting for the news to come to them. They are out in the field where and when the news is being made, and many times even before!

ArCADE Alley will pop up (as in this issue) when there is something spectacular to report. How about it folks? Any other suggestions on how to make the book even better?)

**Nintendo - Software Toolworks
Gauntlet 2**

Type: Adv. Release: Now
Levels: 100+ Difficulty: Avg.

The sequel to the original Gauntlet is coming from Software Toolworks (formerly Mindscape). This time up to 4 players can join in simultaneously, all experiencing the 100+ levels loaded with secret rooms, traps, transporters, force fields, monster generators and the full crew of villains we have learned to hate but respect from the first game. It's straight from the arcades with digitized sounds and new mazes.

Gauntlet 2 does an excellent job of gathering up all the elements from the coin-op and putting tons of enemies on the screen at once. In the process, however, the game goes from what was a 78 record in the arcades, to being a 33 at home. It's there, but it's slow.

Gauntlet was one of my favorites in the arcades. While I admire the company's attempt to make a 'real' 4 player game, the NES is not an arcade machine. It's OK as a 1 or 2 player game and as such, the game does what the first version did - play a decent NES adaptation of Gauntlet.

Gauntlet 2 is a good translation of the arcade game. It has all of the options you would expect, but the game lacks appeal because of washed out graphics and slow, repetitive play. The option for four players is nice, but there is so much flicker and slowdown it doesn't add much.

I was disappointed by this version of Gauntlet because of slow game play and the large amount of flicker throughout most of the game. The game has a jerky feel to it, not smooth and well paced. I like the 4-player mode but it moves even slower and choppy!

**Nintendo - Tradewest
Solar Jetman**

Type: Action Release: Now
Levels: 12 Difficulty: Avg.

The Golden Warship has been disassembled by a group of alien space pilots and hidden on 12 different worlds in the galaxy. You must explore all the planets, find the pieces and reconstruct the ship. Collect extra fuel and buy more powerful weapons as you search the worlds. Use your tractor beam to latch on to and tow unknown alien treasures you find. Refuel the mothership and move on to new worlds.

EXCELLENT! Solar Jetman is one of the best original entries I've seen in a long time, taking the basic premise from the rarely-seen coin-op Gravitar and bringing it home to the NES. Tradewest & Co. have done a fantastic job with this flying, collecting, shooting game with no equal!

Wow! Tradewest has a great hit here with something that is sorely needed for the NES - a new and original concept. It takes a while to get used to the controls but once gotten used to, the game is very addicting. And difficult! The password feature is good as it's a long game.

This is a totally unique game boasting a lot of neat features. Besides a completely original theme (a rare find on the NES) Jetman has a ton of items to find and huge alien caverns to go into. A nice break from the plague of unimaginative carts invading the store shelves.

Solar Jetman is an interesting game because it is so different from everything else. The game play is hard to get used to, and will take some time to master the moves. The massive mazes are long and challenging, making the game even more difficult to master. But still fun!

Nintendo - Tengen Skull & Crossbones

Type: Action Release: Now
Levels: 7 Difficulty: Avg.

Tengen has converted the Atari Games arcade classic for the NES. In this you must kill off the evil wizard and his henchmen on land and sea as they have kidnapped the princess. Gather up all the booty food and weapons you find including coins, goblets, guns, scepters and shields while racing against the countdown timer. Team up with a friend in this swashbuckling adventure of the high seas and castles.

Skull and Crossbones lives up to the arcade version on which it's based in almost every respect. You get jerky game play, poor control, a frustrating goal and very little to be excited over. Skull and Crossbones is one of the first Tengen titles that didn't gush of superior design.

I was surprised to see this type of product come from Tengen. Their previous games were good arcade conversions but while this does duplicate the arcade game, some coin-ops need help! As is, only the very young will appreciate what this game has to offer.

If there ever was a game I'd put out of its misery it's S&C. Although a pirate game is a neat concept this game suffers from choppy animations and annoying sound. Backgrounds are colorful but feature hardly any detail at all. Difficult control and repetition are downers too.

The graphics are not up to what we have grown to expect from Tengen. The sounds don't have the variety either. While it's a different idea it just doesn't live up to its potential. It could have been a better game with more variety and levels that didn't repeat as often.

Nintendo - Hudson Soft Adventure Island 2

Type: Adv. Release: Jan.
Levels: 64 Difficulty: Avg.

Hudson Soft is following up on it's popular Adventure Island NES title with a sequel that contains twice as many areas as the original! Venture through 64 levels of tropical islands, arid deserts and up into snow covered peaks of a mountain range. Grab a skateboard for speed and munch on fruit for energy as you take on huge enemies. Hitch a ride on a friendly dragon when the going gets tough!

Adventure Island was a completely excellent multi-round action/adventure and the sequel not only lives up to this high level of quality, it actually surpasses it. Adventure 2 throws in all types of new objects to interact with, expanding the scope of the first game and delivering plenty of fun!

Hudson has the right idea - take a good adventure game and make it better in the sequel. It is longer than the first and you'll get your money's worth out of this one. A good variety of levels and backgrounds. I like the cute dinosaurs you get to ride.

Adventure Island 2 is really cool. A big step up from part one! It features a whole new quest, bigger than before and large boss creatures that differ rather than just change heads. The dino power-ups are really neat and flying a pterodactyl is a lot cooler than riding a skateboard. Great play!

If you're a fan of the first Adventure Island, then you're sure to like this one. It has great graphics, and the game play is smooth. The new power ups are great, along with some interesting new items. If you hated the skateboard you'll love the new dino buddies.

Master System - Sega Ghouls & Ghosts

Type: Adv. Release: Jan.
Levels: 10 Difficulty: Avg

It was spectacular on the Genesis and has now been downsized for the Master System. Fight against Loki and his underworld servants as you try to survive through an onslaught of evil demons. Find and open treasure chests, at your own risk. Get either a needed power upgrade or a magician who will turn you into a duck. Make it through 5 levels only to have to repeat them all to get to Loki!

The 8-Bit Sega translation of Ghouls and Ghosts is pretty amazing! The graphics are some of the best you'll ever see on the SMS, and the game play remains just as strong. Sound quality isn't up to 16-Bit standards, but there aren't many SMS titles to strongly recommend, but this is one.

Sega is starting to breath more life into the 8-bit. Many of the older titles were only mediocre at best but G&G turns that around real fast. For a 2 meg game the product is spectacular! All the levels are there as most of the action. The bosses are done well and Loki is exceptional!

I'm impressed! I never thought Sega could actually shrink this awesome Genesis game into a 2Meg 8-bit and come out with something decent. Of course the graphics are toned down, but the play remains intact. It's all there, 2 quests, the weapons, Loki, and more. Can't wait to see lil' Strider.

This 8-bit version of Ghouls and Ghost was really great. The game play is a bit rough, there's a lot of flicker, and it does slow down. Otherwise, graphics are great and more than makes up for the lack of detailed backgrounds. It doesn't compare to the 16-bit version, but it's still good!

Enjoy
Hudson

Genesis - Sega Vermilion

Type: RPG Release: Now
Levels: NA Difficulty: Hard

Sega's newest RPG for the Genesis puts you in a medieval setting where eight crystals must be located and collected. Travel from town to town fighting off the demons in the countryside and powering up your weapons and health in the villages. New in this RPG are the multi-view screens - the overhead view of the land, the close-up over the shoulder view of where you are and the side view of the battle screen.

Vermilion comes close to being a RPG, but it basically falls into the "wander around until you bump into something and fight it for experience to move up to higher levels" class. Graphics are decent and the quest will give you your money's worth - fantasy fans won't be disappointed.

I like Vermilion because it's a decent quest game. While not up to Phantasy Star standards, this is the only quasi-RPG game out this season. The different views of the action is great and the side view battle scene is a welcome feature.

Vermilion is a good RPG, it has a big quest and a large variety of items and weapons to get. The graphics are very detailed but the first person scrolling is a bit choppy. Nice music and awesome boss creatures are other high points. The quest is too straightforward and ends too soon.

Vermilion is a good RPG, with great bosses, but the game tends to play a little slow. If you like the first person perspective, then you'll like this game because the whole game plays that way. The adventure tends to drag on, and becomes very repetitious. For hard core RPG fans.

Genesis - Renovation Granada

Type: Action Release: Now
Levels: 9 Difficulty: Hard

Hop in your Hypertek Cannon Tank and go out after the enemy who now dominate the cities, countryside and the skies. Scrolling both vertically and horizontally and shown in an overhead view, you must use your radar to locate and eliminate the mini-bosses on each level. Then go after the level boss. Pick up the weapon options along the way but move quickly as you are also fighting a countdown timer.

Granada is the closest thing to Assault, the awesome Atari coin-op, that I've seen yet on the home. It takes the old tank game and spruces it up by giving you specific missions, weapon enhancements that increase the play technique and a frenzied battle that will give even experts blisters.

A spectacular shooter which is a welcome addition to the Genesis line up because it is hard. Most Genesis games are rather wimpy when it comes to being difficult but wait until you get to the 9th level in Granada it is almost impossible! Good 3-D effects and great bosses!

Granada is a big surprise, it looks like just another shooter, but it requires a lot of technique to master. Great graphics and excellent sound and a purpose to each level, instead of mindless shooting. Granada features plenty of action and challenge and totally cool bosses.

This is a great shooter. The game play is smooth and the action is fast and nonstop. It takes a while to get use to the controls because controlling a tank is a lot different than a plane. It has great graphics and long levels that have decent end bosses. It needs more power ups though.

Genesis - Electronic Arts Battle Squadron

Type: Action Release: Now
Levels: 6 Difficulty: Easy

Electronic Arts first Genesis shooter is a vertical scrolling game set in an overhead perspective. Play simultaneously with a friend as you take out the enemy who has set up strongholds and deployed tremendously huge forces on the ground and in the air. To make it even harder, some of the forces are using a cloaking device which makes it nearly invisible for you to detect them, until it's too late.

Another colorful shoot-out, Battle Squadron just didn't deliver any new thrills that haven't been seen before on the Genesis. The game is a solid piece of blast-em-apart action, but after awhile you begin to wonder if you haven't already stared down the barrel of this cannon.

Great multi-level scrolling backgrounds or 2 player action? It's a tough choice EA had to make but I would rather have the great background. The game looks flat like something that was done on the 8 bit. When stacked up against the competition this is only average.

Battle Squadron just isn't what a Genesis shooter should be. While the graphics and sound are OK the game lacks in intensity. Power-ups are neat, but nothing special. I like the cloaked enemies. They remind me of the Predator. Other than that, a pretty average shooter.

Battle Squadron isn't the kind of shooter that you would expect from Genesis. The game play is slow, and there is not much action. The power ups aren't great, but never the less they do help you out. The two player mode can be fun, if you like to get your power ups stolen. Not too great!

CRUSH 'EM!

Out of the stands and into the ring! Get a headlock on fast-paced wrestling action. Eight rompin', stompin' brutes square off in head-to-head matches that'll keep the crowd on its feet. Go one-on-one against the computer or a friend, or round up your own four-man wrecking crew for thunderous action! **Hal Wrestling**—we're coming to get YOU!

Genesis - Tengen Klax

Type: Puzzle Release: Now
Levels: 100 Difficulty: Avg.

Klax, adapted from the recent Atari Games coin-op and one of the first games to be released on all the popular game systems, is a puzzle game somewhat on the lines of Tetris but with the added dimension found in Columns. It uses a conveyor or belt which pushed tiles towards you. The tiles fall onto a tray and you can move the tray sideways to drop the tiles in stacks for points horizontally, vertically or diagonally.

Another good rendition of what is slowly becoming the favorite game of every system. The sounds are better than on most of the other versions and the graphics look pretty good. If you're looking for a puzzle game on the Genesis, this is probably the best you'll find.

While like Columns, Klax is still unique as you have specific goals to reach before you can progress to the next level. Going for the 'X' is fun as are the other great combinations. The hidden warp levels is a challenge to get. A very addicting game!

It's Klax for Genesis what else is there to say. A very addicting puzzle game to give you a break from Columns. The graphics and sound are good but not as good as the Lynx version. Controls are a bit sluggish, but not enough to detract from the game.

Klax has found its way through many systems, including the Genesis. This is one of those puzzle games that you can't stop playing. The levels vary and the game moves along very smooth. The graphics are good, but you don't have much time to look at them because of the intense action.

TurboGrafx - NEC Final Zone 2

Type: Action Release: Now
Levels: 7 Difficulty: Avg.

A renegade weapons society, responsible for killing billions is threatening the Earth. You and your crew have to take the enemy head on and defeat them with their own weapons! Put on your special suit in this overhead view shooter, and collect the special weapons and power-ups as you fight through 7 grueling rounds. You can choose from 5 characters, each has different weapons and fighting abilities.

Final Zone 2 has that great CD-ROM introduction (complete with vocals!), and wild intermissions with real speech, but when you trim all this away, you're left with a fairly routine walk-and-shoot in the same vein as Commando. The graphics aren't anything to write home about either.

Why bring this out on CD? Other than a few great intro scenes and intermissions the game could have been done on a card. The game is much too short and not up to the high standards we expect from a CD game. Good value though!

Final Zone 2 is a bit disappointing for a CD-ROM game...it only has 7 levels and they're really not that difficult. The cinema displays and music are great, but the game is repetitive and needs more action to spice it up. Needs more variety in game play options.

Final Zone 2 is another great CD game for the TurboGrafx. The graphics are great, the voices are excellent, and the music isn't dull and boring. The game play is fast and there is a lot of action. The one complaint is that you can't keep moving while you shoot. Too short!

TurboGrafx - NEC Veigues Tactical Gladiator

Type: Action Release: Now
Levels: 8 Difficulty: Avg.

There's not much left of our planet but what there is you must save! Protected by your mechanical suit and armed with high intensity laser guns you must take on the enemy who come at you from the front, back, above and even under the water. Destroy as many as you can and get strength points based on your kill. Use these points to add extra protection to specific body parts as it just gets harder and harder...

This is probably one of the lesser entries for this genre on the Turbo. The main character handles with precision of a drunk ice skater, and outside of the assortment of power-ups (which themselves aren't overly special), this game doesn't manage to get very far.

Nothing new here. It's a lot of shooting but that is about all. The game is predictable and while the choice of selectively powering up specific body parts is decent the game just starts to wear on you after a while.

This game is nothing new or exciting. It doesn't exploit any of the true potential of the Turbo and is less than average. I don't like the ice skating robot and its too easy to recharge your life meter. The only things remotely redeeming are the power-ups and the parallax scrolling.

This game lacks in intensity and it is hard to hold my interest. The graphics lack the detail when compared to most 16-bit games, and the music isn't state-of-the-art either. The game play is weak and your robot could move in more directions.

TurboGrafx - NEC Aeroblaster

Type: Action Release: Jan.
Levels: 6 Difficulty: Avg.

Kaneko's horizontally scrolling arcade shooter is being converted for both the Turbo and the Genesis home systems. Set in a side view perspective you must eliminate the aliens who have taken over the planet. It's a very intense game but with the ability to power-up your weapons in 10 steps you can develop some very awesome firepower which you'll need when you take on the huge bosses!

Another side-scrolling shooter for the Turbo that comes off as a bit more challenging than most, with a decent array of weaponry and a cool plot progression. You get lots to shoot at, and while it doesn't come close to Blazing Lazers, it is one of the better blast-a-thons I've seen lately.

Easily one of the best shooters for the Turbo yet. It's all here - great detailed graphics, huge difficult bosses and great game play with a learning curve that leads to the hard side which is a welcome addition to a home game. The weapon power-ups are awesome!

The best side scrolling shooter to hit the Turbo yet! It's hard to believe you're playing a Turbo game. Excellent graphics, awesome music, and super intense game play put this shooter in a league usually found only on Genesis. Very challenging and very impressive!

You can't ask for much more in a shooter! The graphics are great, the game play is intense and it moves lightning fast. The scrolling is great and the music is intense. This is the kind of shooter that you wouldn't expect from the Turbo, but they came through this time. Great game!

GameBoy - Sunsoft Gremlins 2

Type: Adv. Release: Now
Levels: 5 Difficulty: Avg.

The cute little Gizmo is back, this time in black and white for the small screen. The evil Mogwai are everywhere as are pesty bats and spiders who drop down uninvited. With lots of good effects ranging from springs which propel Gizmo sky-ward out of the reach of the enemy, to the novel bonus rounds, there is always plenty of action to keep the game challenging and interesting.

Gremlins 2 on the GameBoy is not a bad game, it just isn't overly exciting. I'm not saying there isn't anything to like, but the pace of the game is so leisurely, you sometimes stop ask if you're having fun. The execution, with intermissions and Bosses is well done, and will appeal to some.

Anything that isn't a puzzle game is a welcome addition to the GameBoy. With the cute, helpless looking Gizmo and great intermissions, the whole game comes off decent and game play on the GB is actual viewable. Slow, predictable but decent action.

Gremlins 2 is an OK game for the GB. Not very intense, but it offers some interesting situations for Gizmo to go through with your help. Great music and graphics, the cinema displays are cool. Mean bosses and a variety of power ups add to this challenging but slow paced cart.

Not being a big GameBoy fan I wasn't looking forward to playing this game, but I must say, it was very addicting. The game play isn't bad, for a GB, you can actually see what you are doing. The graphics are good and the end bosses are interesting.

Lynx - Atari Robo Squash

Type: Action Release: Now
Levels: N/A Difficulty: Avg.

Robo Squash is an odd-name for what is essentially a nineties version of the Atari classic, Breakout! You get the same ball-breaking-bricks challenge, with a paddle that is used to return the projectile back at the tiles, but in this twist you get to play the game in 3-D! Everything comes at you with smooth scaling, and a two-player feature lets you face off in a tunnel of doom where three strikes means you're out.

Robo Squash is about the silliest name I've heard for a game lately, but putting that aside, the game suffers from few faults and delivers what it promises: a 3-D breakout. The splats from missed balls should leave, as they end up filling the screen and making it hard to play.

Granted that Atari needs more titles for this great piece of hardware but this is not the way to go about increasing the inventory. Nothing great here. The 3-D effects just aren't a good enough reason to try Breakout again.

Robo Squash is the first disappointing game I've played on the Lynx. It's just 3-D breakout. I can't stand the way the ball splats against the screen blocking your view of the court. The game just doesn't have any outstanding features for being on such an outstanding system.

Robo Squash is power glove for the Lynx, but you hit the bell back instead of throw it. The graphics aren't the kind of graphics that you would expect from the Lynx. You'll get really tired of the ball splatting against the screen and blocking your vision. It's fun with two players.

GAMING GOSSIP

...Nintendo SFX Update...Sega 16-Bit Game Softs...Double Dragon - The Movie...Nintendo CD-ROM...
Capcom Gets Q-Sound...First Q-Sound Games...Bonk 2 Coming Soon...Atari Set For Pit Fighter 2...

...Well, the cat is finally out of the bag! That sly Nintendo 16-Bit super machine finally found its way onto Japanese store shelves, heralding in a new era of video gaming. While the system, which was first brought to everyone's attention for the first time almost two and a half years in the pages of EGM, sold out more than 300,000 consoles in less than an hour (with lines stretching for blocks days before the street date), it still has a bit further to go before it hits our eager little hands. Nintendo has tentatively approved a September '91 unveiling of their next generation machine, hoping to land yet another product in the number one Christmas gift-giving position next year...But wait! Moi has dug up even more dirt on the Nintendo 16-Bitter! While a consumer version of the device won't be ready until Fall, rumors have it that Nintendo will be unleashing a coin-op counterpart, which uses the SFX in much the same way their Play Choice-10 uses the regular NES, at the ACME arcade game convention early next year! Sure, you'll have to dump a few quarters to get a taste of Super Mario 4, F-Zero and the other great new games on the way, but it beats going to Japan!...

...Here's a hot rumor that finally appears to be reality - several production companies are working on a live action version of the perennial video game bash-em-up, Double Dragon! Not much info was available at this time, but sources tell me that the white shirts in charge of the film have pointed their fingers at Steven Seagal and Jean-Claude Van Damme for the leads! I can already see it: "Jimmy, you better did 911"....Speaking of Mr. Van Damme, recent rumblings have several game companies scouting out this recent superstar to lend his name to various arcade and consumer products. In the early voting, it appears that Atari Games may have scored the coup to win the favors of the ultimate martial arts monster in a game concept that could more easily be described as a follow-up to their current coin-op blockbuster, Pit Fighter...

...Q-Sound, that much heralded technology that reproduces sound in a manner that lets you experience audio input from every direction, will supposedly get its first test drive in the arcades in a new Capcom hardware configuration called the CPS-II system. The premiere offering for the new CPS-II will be Street Fighter 2...What do you get when you cross Ragady Anne's boyfriend with the monstrous offspring of the Munsters? You tell me...Bonk 2 is on its way! NEC scored big with this prehistoric cave-dude and it now appears that they intend to follow-up this success. The American version of the game is about 75% done and will show up in the first half of next year - check out the special Turbo insert in next issue for the first photos of this killer card...

...With NEC riding high with several new CD releases and Sega planning the launch of their own machine, did anyone think Nintendo would really turn their back forever? In addition to rumors that have Super N fashioning a CD-ROM add-on for their Super Famicom, other persistent talk has Nintendo working closely with Sony to produce a device that will interface directly with the regular 8-Bit Nintendo Entertainment System. While I've brought news of such a device before, from Game Genie developers, Camerica, the Sony system is rumored to be much more powerful and boast the ability of automatic machine-CD access. Not only could this boost the size and scope of the games that the NES can produce, it would invite the use of actual music.

...Sega 16-Bit owners need not worry! Quartermann has obtained a super secret list of programs that are supposedly in development and expected for release sometime in 1991! Several new third-party licenses will be bringing these softs your way, although not all the contracts have been completed at this time. The list (drum-roll, please)...Pac-Mania, Rolling Thunder Deluxe, RBI 3, Pinball, Beirut, Midnight Resistance, Area 88, Ultima 6, Winning Run, Line of Fire, Battle Golfer, Thunder Force 4, Air Diver 2, Battling World (Modem), Super Bubble Boble, Incredible Hulk, Captain America, Ninja Warriors, Rough Racer, Final Fight, 1941, Aero Blasters, Fantasia, Vindicators, Darius, Master of Weapon, Turbo Outrun, Cal. 50, Disempu, Galaxy Force, Willow, Toobin', Tarzan, King Kong, Apache, Cadash, Aliens, EPROM, Altered Beast 2, Lunar Lander, 720, Moonwalker 2, not to mention five CD-ROM titles (Forgotten Worlds, Super Monaco GP, Assault, Phantasy Star 4, Dragon's Lair) and a four-in-one cart with Shinobi, Hang-On, Zaxxon and Rastlesia plus more. Sounds great - can't wait...

SEGA AND IBM INK DEAL FOR TERA... A GENESIS AND IBM COMPUTER COMBO!

Sega of Japan and IBM of America have just announced that they are cooperatively working on a new computer which will combine the Sega Mega Drive game system with a 100% compatible IBM computer. IBM will supply the technology and Sega will produce the machine. It is scheduled to be configured around IBM's most popular model - the PC/AT. Called Tera, this machine will be sold both in Japan and in the U.S. at Sega retailers and IBM personal computer dealers. The projected retail price will be about 100,000 yen or approximately \$750.

Sega is planning to debut Tera in the U.S. at the Winter Consumer Electronics Show in January.

Tera's specifications include a dual 16 bit CPU. The standard 68000 Genesis-type chip will drive the game portion while a 80286 chip will power the computer portion. The computer will probably run at the standard 12 Mhz clock speed. The internal computer memory will range from the standard 512 kbytes and can be increased to 2.5 Mbytes. A 3 1/2 inch floppy disk drive will be built in as well as a 20 to 40 Mbyte hard disk drive. The keyboard will be the standard IBM model with built in 4

*First photo of Tera -- the new
Genesis/IBM Computer!*

directional cursor and 18 button numeric keypad. The Genesis game controller will plug in the front of the computer as will a set of stereo headphones. The Genesis carts will plug in "Nintendo style", or horizontally rather than the current vertical 'push down'.

Since the unit will be 100% IBM compatible, literally thousands of already existing programs will be immediately useable.

Tera will come with the IBM DOS version 4.0, and custom word processing and spreadsheet software will be available from Sega as an option. Tentative plans include special game programming software to be made available after the unit is in the stores. This software, Sega says, will allow the user to create his own programs! A 14 inch RGB color monitor and a mouse are also on the option list. The RGB monitor will be a very useful option as Genesis users will finally get to see the true graphic

potential of the system. Previously, RGB imagery was only available to the adventuresome players who were willing to experiment with the output pins on the back of the Genesis. With Tera this feature will be available at the flip of a switch!

Sega currently plans to bring out three models of Tera. The main difference will be the amount of internal computer memory. The in-store date in Japan is scheduled for some-time in the second quarter of 1991! About 100,000 units are forecasted to be sold the first year. Sega intends to position Tera as more than just another low-cost IBM compatible computer. To accomplish this, Sega plans to make the computer versatile, expandable and useable far into the future. The long awaited Genesis CD-ROM peripheral will be able to be connected to Tera through a special interface. With this option and the open architecture of the computer, the huge amounts of memory made available by the CD medium will allow Tera to access data files previously too large for normal chip or magnetic medium. Other great features only possible on CD include full motion video, true voice and high fidelity, full length soundtracks.

The Sega brand computer that IBM has agreed to participate in is intended to be a beginner's model for the younger users. As such, many of the specific computer applications will be game oriented. In the U.S. IBM currently has their low-cost PS/1. When Tera is introduced here it will be marketed in a similar fashion. As to a specific U.S. date, Sega is aiming for late spring. Beyond the U.S. Sega states that they are looking for "...world-wide expansion."

*The new Genesis CD-ROM will
directly interface with Tera!*

SHARP INTRODUCES A TV WITH A SUPER FAMICOM BUILT IN!

Sharp Electronics of Japan has just announced that they will introduce on December 5, 1990 a new television set which will have a 100 percent compatible Super Famicom game system built in. Technically known as the Sharp 21G-SF1, this combination system will sell for 130,000 yen (about \$975) and will include two control pads and a remote control.

The television set has a 21 inch diagonal black matrix flat-tube screen with quartz crystal frequency control. This means that all of the TV channels are automatically set to the Japanese channels and therefore are not compatible to the channels over here. All of the other controls on the TV are the same as those found on any other TV except for one - there is a special switch which automatically reduces the brightness of the TV when the Super Famicom is being played. Japanese TV's have their brightness preset to a higher level than that which is normal for game play.

The remote control is also standard fare with one unique feature - on this model there is a button which resets the game being played!

A TV/game system combination is nothing new to Sharp as they have introduced a TV with a Famicom built in a while back!

Sharp's new TV with a Super Famicom game system built in!

The Super Famicom is built into the top of the TV. It is angled up and to the rear to allow for easy insertion of the cartridge. Three controls are mounted on the SF. They include an on/off switch, and buttons for game reset and cartridge eject.

Two standard SF controllers are included and they plug into the lower left corner of the TV. The controllers carry the Sharp SF1 name though.

All connections between the SF and the TV are internal. As is the power supply connection. Although the stand-alone SF can output a Super VHS (Y/C) and a RGB high resolution signal the internal connections on this TV combo are just the standard Audio/Video type. On the negative side, the TV set only has one speaker and all audio is in mono despite the fact that the SF can produce some of the best stereo audio ever heard on a game system! Fortunately there are stereo output jacks on the back of the TV to run the audio through a stereo system!

The Super Famicom system is built into the top of the TV!

The combo TV/Super Fami comes with two controllers and a remote control which has a button to reset the game on it!

Combining a Nintendo video game system with a television is nothing new to Sharp. The first version of their video game and TV all in one first debuted several years ago when the company released a similar model equipped with the standard 8-Bit Famicom. Similar architecture was employed in the American equivalent, which boasts a Nintendo Entertainment System as part of a similar package.

While the original Famicom models experienced some problems with cartridge compatibility, the configuration of the Super Famicom softs will most likely limit any interfacing difficulties. For the Japanese, Sharp has delivered the gamer's ultimate dream of 16-Bit Nintendo game play with state-of-the-art television quality.

IF YOU FIGURE THIS READY FOR

Pipe Dream. If you're a Game Boy™ or NES® player, you're looking at the next big thing. Because it all comes down to you vs. a whole warehouse full of plumbing parts. And the forces of chaos. But you've got four powerful weapons. Your right hand. Your left hand. Your right brain. And your left brain.

In the real game, this slimy green stuff called flooz starts flowing through the pipes. To stay ahead of it, you have to build the most radical pipeline you can dream up. And that's exactly what you have to do with this puzzle.

Start where it says START, and put each of the nine pipes in an empty square. Make sure every little white dot stays in the top left corner, or your entry won't count. Some pieces have two straight pipes crossing each other. The flooz always flows straight across these pipes and out the opposite side. If you can make your pipeline loop around so the flooz crosses through one of these pieces twice, you'll score bonus points.

(Hint: To get the highest score, you don't have to connect all nine pieces to every pipe on the grid.)

So if this sounds like

your kind of game, try it now. Then go down to your Nintendo dealer, and see what it's like for real. When you've got nine million gallons of flood breathing down your neck. And gaining.

HOW TO ENTER:

Cut the puzzle pieces out of this magazine and paste them in the right places on the grid. Or make a copy and work with that. Then send in the puzzle and the completed form to us.

All entries must be received by January 31, 1991.

IMPORTANT: Write your score on the back of the envelope. Unscored or incorrectly scored entries will be disqualified.

HOW TO TOTAL YOUR SCORE

Add 100 points: For every square the flood flows through. Don't count the starting piece. Count all the pieces you place, and all the pieces that you use on the grid.

500 point bonus: For each place the flood crosses itself in a cross pipe. (Plus the basic 100 points for the square.)

500 point bonus: For each piece marked "BONUS" the flood flows through. (Plus the basic 100 points.)

Subtract 100 points: For every piece you don't use, excluding the pieces you cut out, and the pieces that are already on the grid.

If you figure out the highest score, you win. In case of a tie, winners will be decided by random drawing.

NEW SOFT NEWS

Koei is going to follow up its military history/strategy NES game - Nobunaga's Ambition with a sequel. This version, with the new MMC5 chip and 3 meg + 128k RAM, promises to satisfy even the most dedicated war strategists. A GameBoy version of the original Nobunaga is also in the works. NEC is really going heavy into CD's during 1991. Besides It Came from the Desert, Lords of the Rising Sun and Valls 2 look for great new titles like Shadow of the Beast and Loom! On cards, Bonk will have his sequel, and the TV Sports series will have a basketball and hockey simulation. For Genesis look for a lot of new second half 1991 arcade titles to go up against Nintendo's new SFX and games. CD titles will start to appear in summer with Phantasy Star 4, and Dragon's Lair.

In the 30th century, Viking terrorists, led by the vicious Great Hlagi, are plundering and destroying planets throughout the Galaxy. They move in warships capable of travelling in Nether Space... and Earth is their next target.

Now, there has been an assault on the laboratory of the renowned scientist

Doctor Zerrick Keene who, in a state near death, has summoned his granddaughter, Zana Keene. "Zana," he said, "while experimenting with Nether Space transmission, I caused a huge magnetic field to be formed around our planet, and it has attracted the attention of the barbaric Viking Terrorists." Dr. Keene pressed a keycard into her palm, and with his last breath, whispered, "Zana, use this... save Earth."

Zana Keene, trained as a test pilot at the United Government Military Academy, knew what he had given her... access to the space fighter "Chameleon" ERX-75... capable of combat in Nether Space, and of transforming itself into a robot... the strongest weapon ever developed by the United Earth Army. Eons ago a once peaceful civilization lived on our planet. Great Beasts arose from the underworld and almost completely destroyed the world. When all seemed lost the people called upon the spirit world for help. A tiny witch of great power and magic took pity on their situation and drove away the Beasts. Since then the world rebuilt itself and lived in harmony until the present day. Now the world is again on the brink of destruction, this time by a battalion of robots from the planet Krion. The people once more called out for Francesca's help. You must save the world by locating and destroying the Krion leaders hidden somewhere in the mazes of their flying battleships!

It may look like basketball but it probably should have been called basket-brawl! Don't expect a super detailed 5 on 5 simulation, but rather this is a great fun game where everything goes as there are no fouls called by the ref! The ref's eyesight is so bad that when he runs down the court to follow the action he will trip

the players! Some basketball skill is necessary though, as you still have to dribble, pass and rebound but to steal the ball you do have a 'punch-out' move! And pushing, tripping and elbowing are all legal! What counts is that you make the baskets, any way you can! It's not pro ball but who says you can't have fun once in a while?

MICHAEL JACKSON'S MOONWALKER

Sega/Master System

Rescue the children.

Michael Jackson is stepping down from his 16 bit world into the SMS realm. Surprisingly, it is a very small step as most of the detail and game play has been preserved in this new 2 meg cart. Michael still must save the kidnapped children, and his weapons - his hat, fists and magic dance are there also. Like Ghouls and Ghosts reviewed last month, Moonwalker is a 'step' in the right direction for reviving the tried and true Master System!

Wipe out the thugs!

Zombies in graveyard!

Michael can still use his magic dance to eliminate the enemy!

Similar to Genesis!

PHANTASY STAR 3

Sega/Genesis

The third in the Phantasy Star series is in process of being converted for the Genesis. Text translation (the hardest part) is under way and this version promises to be the best one yet! Special features include 7 different worlds to explore and characters which will age, marry, grow old and die! The children are the ones which will survive in the end. Another much welcomed feature is that the game isn't 'linear' - that is only one way to get to the end. For instance, should you decide not to marry, you will take a different path to one of the four endings. With improved graphics and better battle scenes, PS3 will be a game worth waiting for.

The battle scenes now have varying background graphics and a much larger quest which spans seven different worlds!

M.U.S.H.A. Seismic/Genesis

It stands for Metallic Uniframe Super Hybrid Armor and it's hot! Easily one of the best overhead view, vertical scrolling shooters, M.U.S.H.A. offers great multi-dimensional parallax scrolling backgrounds, weapons which can be powered up to awesome proportions and some of the most intense and

challenging game play to come out for Genesis in a long time. The eight level game also breaks new ground in areas of scaling where, for instance, defeated enemy fall down into a bottomless pit and slowly decrease in size in the process. It's a great follow-up to Hellfire and another exciting game from Seismic.

CRACKDOWN Sage's Creation/Genesis

It's the early 21st century and science has progressed to the point of creating an artificial life form. An evil scientist has found a way to control these androids and wants to use them to take over the world. You're a member of the Secret Service and, along with a friend, must use the special time bombs to destroy their facility before they can launch their invasion. Not only is it a race against time but you must also eliminate the androids who have already started out on their world take-over. It's an overhead view of the fortress and the screen is split so each of you can progress independently.

Patrol the streets watching out for the enemy lurking around the corners as you try to destroy their fortress.

KUNG FU MASTER

Irem/GameBoy

Talk about mideast crises! In Kung Fu Master it's you against a whole army of ninja mer-cenaries. Set in the deserts of the middle east with pyramids as backdrops, your orders from the commander of Control Center direct you to penetrate the main factory of a ruler known only as 'Daddy Long Legs'. Spy reports have indicated that he is injecting a concoction of Scorpion juice into the petroleum he is selling to other countries. You must travel across the sands without any weapons other than your kung fu skills and put an end to this evil scheme. Punch, kick and flip your way through 6 grueling levels loaded with some of the most fearsome enemies to hit the GameBoy screen!

Try to destroy all of the enemies you encounter as many will be carrying hidden potions, health restorers, extra lives and much needed bombs.

Your main weapons are your kung fu skills. Master the combinations of the punch and kick attack moves with the defensive flip, squat and jump moves.

TOP SECRET VIDEO GAME TRICKS, CODES AND STRATEGIES

SUPER MONACO GP

(Sega/Genesis)

Lose your Head! - Sega has built a very unusual trick in their excellent racing game. To get it to work you must play the game in the GP mode. Play for a few rounds until the 'Wet Condition' track comes up. During this race you must finish in the top 3 drivers. As you cross the finish line hold down the A, B, and C buttons. Watch for the trophy screen and you'll lift up your head instead of the trophy!

???????????

Play the game in the GP mode.

The trick only works in Wet Conditions.

You must finish as one of the top 3 racers.

Normally the driver holds up the trophy!

MONDU'S FIGHT PALACE

(Mediagenic/Genesis)

Play as one of the Opponents - Normally you are Rex, the hero, and you take on the 16 different opponents. Try something different, and play as any of the 16 characters and wrestle with Rex. To do this, at the title screen enter one of the controller and button configurations as shown in the table at the right. When it shows 2 codes combined, press them at the same time.

CHARACTER	CONTROLLER CODES

INSECTOR X

(Sage's Creation/Genesis)

Unlimited Continues - Insector X can be a tough game to beat for the average player. There is a way to reset the number of continues any time, and as often as you wish, to the maximum of eight! After you see Game Over on the screen, at the continue mode, push and hold diagonally left and up. Then press the C button. Each time you press the C button increases the number of continues by one!

MEGAMAN 3

(Capcom/Nintendo)

Partial Invincibility - There is a strange trick built into this version of Megaman. To get temporary invincibility you must do the 'super jump' trick as detailed above. You can only do it in certain places, and it must be done at just the right time. Note the pictures below and jump into the specific holes. After you enter the hole your energy meter at the upper left of the screen will rapidly decrease. Just as it reaches zero do the 'super jump' out of the hole. Your energy will always stay at zero but it will never get any lower either!

Konami/Super Famicom GRADIUS 3

We all know how great the Super Famicom is supposed to be but not until now can we actually see how spectacular it really is! Konami has just make a near perfect translation of the most recent version in the Gradius arcade series - Gradius 3! And got it to fit in just a 4 meg cart! Many of the features are similar to the previous games. You can select the types of options you'll use from a list in the beginning of the game; the ground based enemy are virtually identical and the procedure for upgrading your weapons remains the same, but there it ends. Everything else, from the finely detailed graphics, the perfect game play to the spectacular stereo soundtrack put this version of the game in a class by itself!

The Desert level with dragons and sand lions comes first!

The huge first level boss waits for you in it's sand lair.

Blow away the huge but deadily water droplets in level 2!

Fly around the rock formations taking out the ground bases!

Blow a path through the rocks to uncover the level 3 boss!

As you get farther into the game even the plants come after you!

Each level of Gradius 3 is divided by cataclysmic conflicts with huge Boss opponents!

Video games, pinballs, redemption machines, electronic darts, music, and music video CD jukeboxes... they're all here. Everything is set to free play and maximum volume. Anything to get the operators attention! And if the product won't get people in to take a look then there are the unbelievably attractive super models handing out literature with a smile you just can't resist. Still not enough to get your attention? There are high score contests for T-Shirts and even a few celebrities made guest appearances. The big names this year were in the Data East Booth. Both Bart Simpson and his creator - Matt Groening were the featured guests. They were on hand to promote Data East's sensational new pinball game, appropriately named... The Simpsons (See issue 17 of EGM for an in depth review of this great pin!).

The AMOA show also had educational seminars on topics which ranged from forming pool and dart leagues to pinball machine maintenance. All valuable information for those in the business.

As for game enthusiasts and aficionados like us, this show provided a sneak preview of the arcade games we can expect to see later in 1991. After what we saw, we can't wait!

GP Rider (Sega)

Authentic motorcycle racing featuring linked play for 2 player simultaneous racing. With exceptionally high quality graphics that we have come to expect from Sega, GP Rider offers the most realistic cycle racing in a long time.

Pit Fighter (Atari Games)

Digitally processed graphics present a greater sense of realism to the action-packed street fighting type game. Up to 3 players can compete at once. Features include the Grudge Match in which the last man standing is the winner! Fight your way to the final battle with the Masked Warrior.

Dragon Saber (Namco)

The sequel to Dragon Spirit. Another vertical scrolling shooter with smooth animation, extremely detailed graphics and really huge bosses! The fire, egg and jewel items are back as are the change options - 3 heads, fire dragon, ax dragon and spark dragon. For 1 or 2 players.

Brute Force (Leland)

Reminiscent of Bad Dudes. It's a 3 man force against crime. With 60 scenes in 4 city levels, punch & kick your way to clean up the city.

Thunder & Lightning (Romstar)

Very similar to Arkanoid. Break out of the 30 walls of Regret with the Demo Ball and the Thunder Stick (also known as the 'paddle' and 'ball'). Easy to learn, but hard to master.

Other new games coming out soon include Double Dragon 3 by American Technos; Ataxx by Leland; The Super Spy by SNK for the NEO-GEO; Escape Kids by Konami; Hammerin' Harry by Irem; Carrier Airwing by Capcom; and a whole list of new pins like Riverboat Gambler by Williams; Dr. Dude by Bally; and Title Fight by Gottlieb/Premier.

THE EMPEROR'S NINJAS...

Natsume has played a long and important role in the video game field as one of the leading cart developers in Japan. Their expertise comes from a talented staff with many years at successful companies such as Konami and Capcom. Now, the company is launching their own Nintendo titles in the states, highlighting their expert skills at producing action games with the release of their first game, Shadow of the Ninja.

Shadow of the Ninja displays the fine attention to play mechanics and technique that have made earlier Natsume entries instant favorites. In this one or two player game, you control a deadly duo of martial arts masters as they seek out to dislodge an evil dictator who has struck out to take over the entire world! With armies capable of fending off missile attacks and jet fighters, this silent pair have the advantage of stealth on their side, as you confront all types of high-tech soldiers and even more powerful Bosses.

Natsume expands on what might otherwise be a fairly ho-hum standard style action contest, by tossing in their usual dose of play interaction and coming up with a new technique that is very exciting! The lead characters in Shadow use special Ninja claws which allow them to secure themselves to the underside of not only the separate platforms that lead you through the rounds, but also on revolving areas and moving walkways. This small feature creates a much more challenging environment where escapes and quick-moving patterns replace the usual "walk-your-hero-in-front-of-wallpaper-backgrounds" mentality that populates the majority of similar carts.

Destroy the capsule boxes to reveal more powerful items!

That's not to say Shadow of the Ninja doesn't have great graphics or sound either. On the contrary, Shadow boasts some of the best visuals you'll see in this type of game. While this is high praise, Shadow of the Ninja is the kind of game that deserves the extra attention. In a sea of licensed names with no game, Shadow of the Ninja is a refreshing and original

SHADOW OF THE NINJA

The Throwing Star, that good old Ninja stand-by, let's you fight the enemy from afar!

The grenade can also be used at a distance, and delivers an explosive punch to a wide area!

GI JOE

Get your mission outline from the Headquarters prior to battle!

"YO, JOE!"

The "Real American Hero" strikes out to defeat the fiendish plans of the ruthless Cobra alliance in his first video game adventure from Taxan!

In GI Joe you command a five-member assault force of five of Joe's most powerful members, including Duke, Rock & Roll, Grid Iron, Blizzard and Snake Eyes. Using each of these commandos special abilities, you must fight your way into the mission zones, locate and place your explosives, find the exit and escape the mission zone before it's too late. Each level begins with General Hawk selecting a mission specialist and you choosing a support staff of two Joe members.

Once the Joe group enters the mission zone, the game introduces a new goal to the side-scrolling action theme. Maneuvering within environments that measure up to 56 screens horizontally and vertically, you must locate specific areas and place bombs to destroy the Cobra enemy.

During the action you can switch to your other Joe fighters at any time. Along with the exceptional round definition and the usual assortment of power-ups, vehicles and Boss attackers, GI Joe delivers all of the explosive combat action you'd expect in a package that takes a conventional approach to the action theme.

While in the Cobra hideouts, place your explosive and find the exit to escape!

SUB-MACHINE GUN SUPER HERO

Continuing with their line of licensed titles for the Nintendo Entertainment System, LJN brings the Marvel comic book hero, The Punisher, to the video game screen!

Modeled after similar "from behind" target shooters like the arcade Dynamite Duke, The Punisher puts a machine gun in your hands and plenty of bad guys in your line of fire. While the screen slowly scrolls by, presenting different environments filled with equally hostile enemies, The Punisher takes aim (via moving crosshairs) at the bad guys and lets go with his weapons of destruction. In addition to tracking down the other characters in the game, you are also able to interact with street signs, windows and other parts of the background for bonus points and items. The game increases the incentives of looking for these hidden "targets" by releasing additional forms of weaponry like a bazooka and M-16 machine gun for rapid fire action. With these extra power-ups, The Punisher can become even more powerful, something that is especially helpful when confronting the game's Boss characters.

When the Punisher encounters the Jigsaw Boss, only fast fists and feet can help lay him to rest!

POWER-UP ICONS

When The Punisher manages to reach any of the Bosses guarding each of the different levels, the play action changes to accommodate the one-on-one battle action. Besides boasting some mean machine guns, Mr. P. can also take advantage of his powerful punch and kick abilities to vanquish the Bosses that appear.

The Punisher is very similar to Dynamite Duke and other scrolling target shooters, and comes out as one of the better in this breed. While the main activity: shoot, shoot, shoot, does remain constant through most of the game, the Boss encounters help break up the pace while retaining the challenge. The Punisher remains active from beginning to end.

Successful shooting takes you to the bonus stage!

you had seen it all...

A new challenge
radiates forth from
worlds beyond imagination.
Surge through scrolling lava
flows and the thrust of massive
rock caves. Avoid losing control
amid perilous bubbles in
the murky depths... to en-
counter even greater challenges
in realms of deeper dimension.

CALLING DICK TRACY...! CALLING DICK TRACY...!

As Dick Tracy sits quietly at his desk in his office, the peaceful silence is rudely interrupted with the familiar voice that he has heard so many times before over his wrist radio. It's the sound of trouble - the radio dispatcher is calling Tracy back to work. This time he senses that it is real bad news and in an instant he hears that all his fears have been turned into reality! Big Boy Caprice is out on a rampage with his gang of thugs - Itchy, Flattop, Cueball and all the rest. You know what to do, get the scoop from Breathless Mahoney and hit the streets with your tommy gun in hand. Blow away the bad guys so you can get to, then eliminate, the gang leaders at the end of each round. Rest during the intermissions between levels and build up points by shooting the targets during the bonus rounds.

GRAB YOUR TOMMY GUN AND GET THE MOB

Rogue police detective Dick Tracy has a problem and that problem is crime. This is no faceless villain either, but instead a well organized group of misfits out to stop the police force no matter what the cost.

Led by a ruthless mastermind and his group of oddball mobsters such as Flat Top, Itchy and The Brow, Dick Tracy's peaceful surroundings have been turned into a war zone. Gangsters roam the streets, spraying machine gun fire in all directions, while their Bosses hideout in different parts of town.

Dick Tracy uses elements from several different types of games to bring the comic book action to life. Each round features interaction on two separate levels. Not only does Dick Tracy fight, with pistol in hand, against crooks walking the same streets as himself, he can also open up with his Tommy Gun to take out bad guys shooting from the opposite side of the road. ferent locations on the screen, adding a new type of challenge to the typical side-scrolling action/adventure theme.

Besides boasting an intriguing new play concept, Dick Tracy on the Sega Genesis also retains many of the conventional features of action titles. Among these items you'll quickly discover common round definition that has Tracy venturing through a scrolling playfield of danger right up to a face-to-face confrontation with one of the Bosses that populate the game. New strategies must be employed at these junctions in the game to overcome stronger opponents to gain the right to move to more difficult stages.

Action fans may find the assortment of special power-ups to be few and far between, but the game makes good use out of the script that it is given. The level of interaction that Dick Tracy enjoys is much higher than in most games of this type, with nearly everything in the backgrounds capable of being blown away by the detective's fierce firepower. BIO-MORPHISM GONE AMUCK...

Information Global Services, one of the TurboGrafx licensees, has a new shooting game which takes place in a distant galaxy that has been taken over by a race of huge mutated alien beings. You must search through the entire solar system, dodging floating asteroids, grabbing the awesome weapon enhancements, and eliminating the enemy vessels which are out patrolling the nebula. Zoom down to the planet's surface and deep into underground caverns to get to the alien bosses who have started this galactic war. Only after you destroy the mother brain can the galaxy be freed from their tyrannical rule!

THE BOYS ARE BACK IN TOWN...

The original Contra set the standard for scrolling action shooters as we know them today. Konami built upon this intense pacing and crisp graphics style, bringing Super C to the forefront of the category on the NES.

Now Konami has hit gold once again with their machine-gun toting mavericks in the latest Contra conflict for GameBoy in Operation C.

Operation C uses the same scrolling playfields and multiple weapon power-ups found in the first two adventures, while adding a selection of enemy characters that, in many ways, represent an even more challenging opposition than in either of the previous games.

In terms of quality, Operation C reaches new highs for GameBoy graphics and sound. While the action moves along at a brisk pace, the game subsequently suffers from some blurring, but aside from this minor detraction, Operation C stands as the first well executed GameBoy land battle to yet appear!

The Power Capsule increases the effectiveness of your regular machine gun shot!

When the Spread icon is collected, your soldier becomes armed with multi-directional firepower!

The Hunter weapon shoots a burst of firepower which locks on and pursues hostile enemy positions!

The Fireball power-up equips your character with a powerful and large burst of explosive energy!

Mega Man is back! In this third installment of the Mega Man Saga, our hero faces 8 new robots before confronting the real problem maker, none other than the infamous Dr. Wily. We're here to get on your way to saving the world with a guide to the first 8 worlds of Mega Man 3.

MASTER FOUR STAGES FROM MEGA MAN 3!

Get ready to battle a whole new troupe of mechanical bad guys in Mega Man 3! Magnet Man, Hard Man and Snake Man are but three of the eight new adversaries you must face off against while pushing to the highest levels of the game. Mega Man must learn their evil ways if he is to succeed.

Eight new mechanical foes on brand new worlds

NEEDLE MAN

Run past this bad guy quickly!

Once again Megaman must face a large variety of roboized enemies on each world.

Energy sucking Robomosquito

Helmethead returns and this time he shoots a spread

Jump after he shoots twice - he'll roll up and over you if you don't

Use timing when you meet the porcupine to avoid the attack of his deadly quills.

The cannon will shoot as soon as you approach it

Take it out with rapid shots before it opens to shoot

Check out the 8 new weapons to get!!

 <p>NEEDLE CANNON</p> 	 <p>SEARCH SNAKE</p> 	 <p>GEMINI LASER</p> 	 <p>SPARK SHOCK</p> 
 <p>MAGNET MISSILE</p> 	 <p>HARD KNUCKLE</p> 	 <p>TOP SPIN</p> 	 <p>SHADOW BLADE</p> 

Mega Man's new move gets him through tight spots.

This is the first place where Mega uses his slide move.

Slide under this new type of jumper to get by without a scratch.

Get ready for your first Boss encounter with Needle man!

When he jumps to fire at you, slide under, turn around and blast him.

Time your jump to avoid the final Needle trap.

Use timing, and plan your moves to avoid the traps.

The slide maneuver will help in this spot.

When you slide under the Needle man's attacks, you can avoid them.

Mega Man continued into the booby-trapped depths of Needle man's lair.

SNAKE MAN

Enter into Snake Man's realm and blast his reptilian minions!

Stay left, jump and shoot at his head.

Here you face 3 snake cannons at once.

Watch out for snake cannons guarding Snake Man's fortress.

Jump and shoot in a timed pattern to kill the snakes easily.

Keep going you're almost out of the twisted maze

Be sure to get rid of the lower snake before jumping here.

Many new enemies to see and fight.

Keep shooting here to nail this guy.

Try to shoot the cyclops when he appears.

If he gets by you he'll drop 3 fire bombs.

GEMINI MAN

When you jump in the hole hug the left wall to get a free man!

Here you meet Protoman for the first time.

He helps Mega get into the underworld.

Fight the duck monster and regain some lost energy

Here you can power up your life and weapon meters.

Get these capsules and recharge Mega for the upcoming battle.

Don't rush or you won't make these jumps.

Prepare the Needle cannon for the fight.

Strike hard and fast, jump to avoid his shots.

When he comes in close, fire as fast as you can for best results.

Now face off with the slimy Snake Man!

Now you have the Search Snake!

Careful the penguins fire explosive eggs.

From here this enemy can safely be destroyed.

Here is where using Rush becomes a necessity, don't forget to get the capsule to recharge the Jet.

Use small jumps and rapid shots to kill these annoying creatures.

What's your sign Gemini Man? definitely not the snake.

When you enter, Gemini Man will split into two.

Use the Search Snake to blast his twin away.

You've received the Gemini laser!

Go for the main man and let him have a dose of rapid fire snakes.

SPARK MAN

When he fires his boomerang go in with rapid fire to waste him.

More silly and unique enemies to destroy

You have a brief second to jump through the barriers when they disappear.

This section calls for timing and planning out your moves to get through.

The moment you step on the platform it shoots to the ceiling above.

Watch out for those spikes Mega Man. Ouch!

Don't jump too late or too soon, or else!

MAGNET MAN

Magnet Man changes the laws of gravity in a stage full of disappearing blocks and bottomless pits!

HARD MAN

Many different challenges await you in this stage.

New enemies wait in ambush at every corner.

Shoot this guy in the head to destroy him before getting the power-ups.

This is a difficult section of the round, once you start moving there's no going back.

Just like earlier in the level you have to watch your step here.

Keep in time with the platforms and shoot out the bolts before they screw together.

Use Rush to get the power-ups and re-charge the Needle gun.

Shoot the blocks to fill your life and get 1-ups.

Use the Needle cannon or regular to waste him, it also helps to have a few E capsules

Time to blow Spark Man's fuse.

Stay on either the extreme right or left to survive.

The Spark Shock is now in your possession.

TOP MAN

Top Man's clan of wacky followers will have your head spinning in this rather straight forward stage.

S H A D O W M A N

Get ready for an intense battle with the extremely agile Shadow Man.

The Future is Finally Here...

TERMINATOR 2: JUDGEMENT DAY

"I'll be back..."

With those three words an advanced cyborg killing machine from the future set out on a last-ditch mission to kill the mother of its opposition in the now classic science fiction action film, Terminator. Largely responsible for launching the careers of its stars (most notably the muscle-bound title character, Arnold Schwarzenegger, Michael Biehn of *Aliens* and Navy Seals and Linda Hamilton who went on as the

Beauty opposite the Beast on television). It also placed the genius of director James Cameron before studio heads who realized his talent for "aggressive" story telling, leading them to the wise decision to have Cameron helm both *Aliens* and his original story, *The Abyss*.

Now, some five years after Terminator exploded onto movie screens, Cameron and company are back to finish their high-intensity tale of an apocalyptic future where machines have mastered man.

While the producers are keeping most of the specific details of Terminator 2, sub-titled Judgement Day, it is known that the The Arnold will return to reprise his role as a merciless machine out for the blood of Hamilton's Sarah Connor.

Movie insiders have speculated on many different possibilities for a Terminator 2 storyline, both the most consistent rumors have Judgement Day leading up to the robot rebellion and a climax between a Cyber-Dyne 101 sys-

The robots are back and meaner than before...or is that after?

tem (that's an Arnold Schwarzenegger to you and me) and John Conner, the offspring of Sarah. With the backdrop of a nuked-out city skyline (which we saw briefly in Kyle Reese's flashbacks in the first movie), the pace of the movie will surely live up to expectations.

Whatever the plot, Arnold's ability to make the Terminator a believable creation and Cameron's fondness for high-tech weaponry and lots of bang, bang, bang are a formula that's guaranteed to deliver once again. And with the possibility of pitting the resistance against multiple Arnolds, the Terminator series is destined for all-out war! Video games? Don't worry, it's already being worked on and we'll give you the scoop next month!

Target Earth

Now you face the enemy commander, his true identity will be a surprise to you.

The battle must be won if the future races of the planet Earth are to survive!

The Earth is In Big Trouble

Long ago a group of explorers left the planet Earth to search the galaxy. These beings have now returned to reclaim their home world, and remove the human race forcefully in the process.

As the lead grunt in a multi-front battle against the bad guys, you must face down incredible odds as you escape your outpost, reach the alien war machine, and infiltrate their secret base for the final confrontation with their leader...

Gather your wits As you walk away from the burning wreck

Take advantage of all assistance you can get in the final battle with the alien menace...

THE END

MegaMan[®] 3. Anything else you need to know?

*You'll slide through secret
tunnels to avoid
hulking robots.*

*It's hard to top TopMan's
dangerous spots.*

*You and your sidekick Flash
will fly over enemy territory to
avoid the walking time bombs.*

SnakeMan, HardMan, GeminiMan, MagnetMan, NeedleMan, ShadowMan, SparkMan and TopMan. They're the eight new robotmasters in MegaMan 3. Defeat them all and you'll still have Dr. Wily to deal with. And possibly even a few of your old enemies from 1 and 2. Okay, now the only question that remains is how fast you can get to the store and get 3.

Master The Skies

Imagine yourself astride a winged horse, thrusting and slashing with a magical sword... Or skimming the earth on a futuristic airbike, blasting through waves of attack robots... Just imagine... Now get ready for the kind of innovative games we're known for.

New from NAMCO, the
Game Creator

Ancient gods of Greece at war! Evil Typhon, lord of the underworld, has kidnapped lovely Artemis, the moon goddess. Apollo, the sun god, attempts a rescue astride the winged horse Pegasus. With your expert guidance, they soar through the sky and battle the likes of the snake-headed Medusa; and Charybdis, the sea monster. Extra fire power, lives, and speed will help in the final assault...but don't forget to grab Phellos the Sword of Light, when it is offered.

"Great colorful graphics that will knock you out of your chair! Dazzling multi-moving graphic imagery and theme music... Exceptional!"

-1991 Video Game Buyers Guide

Space combat at the Earth University. That's what you signed up to learn. Armored attack robots are blown away as you deftly pilot your deadly airbike through fantastic 16-bit 3-D-like graphics of Earth terrain and alien ruins. Next class, you hop in your fighter plane to battle boss enemies and mop up in the bonus rounds. When you've finally mastered armament upgrades and piloting skills, you'll pass level six and graduate, earning the title "Space Fighter."
